

**PHASE IV DEBRIS REMOVAL SURVEY**  
**Preliminary Environmental Unit Review**

Waterway: Marsh Island, 8800

NOAA reviewer: Jessica White 

Date: 6/16/2008

**Checklist of Environmental Factors** – Assess the potential for impacts to the following resources/areas and coordinate as necessary:

- ☒ Habitat/environmental sensitivity – intermediate/brackish marsh in Marsh Island, do not cause physical damage to marsh
- ☐ Threatened/endangered species
- ☐ Cultural/historical resources
- ☒ Oyster habitat – public oyster areas in bay adjacent to work area
- ☐ State/federal/tribal lands
- ☐ Scenic waterway

**Summary and Conclusions of Environmental Review:**

Habitat/environmental sensitivity: Marsh Island is comprised of intermediate and brackish marsh. Limit travel to open water to avoid impacting marsh habitat.

Threatened/endangered species: None present in the work area.

Cultural/historical resources: No known resources at this time.

Oyster habitat: Public oyster areas are located in West Cote Blanche Bay. Look for oyster reefs and avoid activities near them. Public oyster areas are protected by the state.

State/federal/tribal lands: None appear in the survey area.

Scenic waterway: Not a scenic waterway.
